## ASNT Level II Study Guide: Magnetic Particle Testing Method

## **Text Correction**

The following text correction applies to the second printing of the ASNT Level II Study Guide: Magnetic Particle Testing Method. Subsequent printings of the document will incorporate the correction into the published text.

## **Page 32:**

The following chapter review questions should be changed to read:

Q.6-6 A pie gage is used to determine:

- a. the general direction and approximate strength of the magnetic field induced in a part.
- b. the specific direction and strength of the magnetic field induced in a part.
- c. the strength of the internal magnetic field.
- d. how to cut pies into equal portions.

The correct answer is a.
