LOU DIVALERIO TECHNICIAN OF THE YEAR

The Lou DiValerio Technician of the Year gives recognition to ASNT members who are deserving technicians, encouraging their continued participation in the Society. Nominees must hold a position of employment that corresponds to general guidelines similar to those described by Recommended Practice No. SNT-TC-1A for defining the primary duties and responsibilities of Level I and Level II technicians. The recipient is an individual who has distinguished himself or herself by showing exceptional merit either as an NDT technician or through service to the Society.

Nominations are made jointly by the technician’s employer and the local sponsoring section and must include supporting documentation attesting to the fact that the nominee is a practicing NDT technician. A nominee’s application is evaluated and approved by the Non-Financial Recognition and Honors Committee.
