The following corrections apply to the second version (v.02) of the Lecture Guide PowerPoint® CD in the Ultrasonic Testing Instructor Package. The third version (v.03) has incorporated the corrections.

Lesson 2, Slide 10:

The last bulleted point in the Notes view regarding Rayleigh waves has been changed as follows: “Will travel about 90% of the shear wave. Will propagate on the surface of steel at a velocity 8.4% less than shear waves.”

Lesson 2, Slide 11:

The label of the left-hand diagram has been changed from “Asymmetrical” to “Symmetrical.” The label of the right-hand diagram has been changed from “Symmetrical” to “Asymmetrical.” This is in accordance with the most recent errata for the NDT Handbook, third edition: Vol. 7, Ultrasonic Testing. The corrected slide is shown below:
Lesson 2, Slide 17:

The labels of the diagrams have been interchanged the same as for Slide 11. The corrected slide is shown below:

Lesson 2, Slide 29:

The first bulleted point has been changed as follows: “a liquid-to-metal water-to-steel interface is about 20:1 31:1 (about 80% 88% reflection).” The corrected slide is shown below:
Lesson 4, Slide 9:

The second instance of “sulfate” has been changed from “sulphate” to “sulfate.”

Lesson 6, Slide 36:

The third bulleted point has been changed as follows: “They are not also suitable in tests of coarse-grained, highly attenuative materials.” The corrected slide is shown below:
