Radiographic Testing Instructor Package

Text Correction

The following text correction applies to the second printing of the Instructor Lecture Guide quiz key in the *Radiographic Testing Instructor Package*. Subsequent printings of the document will incorporate the correction into the published text.

Page 135: The answer to question #2 in the Lesson 4 Quiz Key should be false, as shown below:

2. If light with intensity of 10 000 units is used to see a radiograph film, and only 100 units of light pass through it, the density of that film is 3.0. **FALSE**
